Professional Experience

TechLiberate | Los Angeles, CA

2018 – present

Global provider of custom software development and technology consulting.

Chief Executive Officer

- Responsible for shaping the strategic vision of the organization and relentlessly drive it to completion, in order to achieve result-driven business goals.
- Direct all operations and business activities to ensure they produce the desired results and are consistent with the overall strategy and mission.
- Make sound investing decisions to advance the business and increase profits.
- Build trust relations with key partners and stakeholders and act as a point of contact for important business relationships.
- Maintain awareness of the competitive market landscape, expansion opportunities and industry developments.

PromaxBDA International | Los Angeles, CA
Worldwide association of entertainment marketers and designers.

1999 – 2018

Chief Information Officer

2010 – 2018

- Provide strategic vision and direction for the development and implementation of all information, technology and engineering services for association with a global membership of 10,000+ companies and individuals with representation in over 65 countries, at every major media organization, marketing agency, strategic and creative vendor and technology provider.
- Oversee technology system operations and manage a portfolio of large scale, high profile global technology projects and globally distributed development teams of over 40 employees and contractors, including third-party vendors and outsourced partners, with emphasis on agile development methodologies and project management best-practices, in a demanding environment of a 24/7 operation.
- Define and align information systems implementation strategies with regional offices located in London, UK, Sydney, Australia, and Singapore.

Senior Vice President, Global Information Systems

2006 - 2010

Vice President, Global Information Systems

2003 - 2006

Director, Information Technology

1999 - 2003

Selected Achievements

- \$7.5 million in annual revenue generated by a fully customized, fully automated Awards system developed in-house, responsible for the submission/transcoding/processing of more than 55,000+ video assets submitted for 19 award competitions on six continents annually. These award entries are scored and tabulated online by more than 2,500 judges using a secure, real-time platform using one of the most powerful cloud-based content delivery networks available.
- Developed global technology strategy in conjunction with all regional offices, responsible for increasing the Awards revenue of the association by over 15% year-on-year over five years, to more than 52% of the total global gross annual revenue of the association.
- \$1.9 million in cost savings generated as a result of overseeing implementation of a digital strategy that utilized on-demand Software as Service (SaaS) architecture versus developing entire project in-house.
- Directed multinational, geographically distributed development teams to create numerous cost-effective global software solutions, saving \$1.1 million in development costs.

- \$800,000+ in sponsorship revenue raised by leading creation and launch of the company's first global CRM/ ERP system, which was key to boosting brand awareness and facilitating global partnerships.
- Successfully negotiated favorable pricing/terms with vendors for numerous software licenses, hardware equipment, technical and telecommunications contracts; saved \$400,000+ over a four-year period.
- \$150,000 in revenue growth garnered after designing and rolling out proprietary video-on-demand service for ABC, NBC, CBS, and FOX networks, providing breakthrough strategic growth to this firm.
- Grew association to 500+ active members in Europe and more than 490 in Asia as a result of championing an initiative to establish international chapters managed from overseas offices by steering committees.
- 30% in gross revenue growth with a 15% increase in member satisfaction and 18% increase in member growth achieved after integrating technology and business strategies to support the company's IT infrastructure.
- 25% in revenue growth attained by plan across operations. Designing and deploying a custom CRM/ERP platform to enable all global offices to conduct data analysis, playing a key role in overcoming cultural barriers across operations.
- Spearheaded the General Data Protection Regulation (GDPR) compliance project, including the assessment, data security solution design, data segregation, data discovery, and classification design, in line with best practices, governance, planning, budget management, and evaluation. Designed a Privacy Program to meet compliance, working closely with internal and external teams. I also investigated and implemented technologies to protect data in transit and rest within and outside of association boundaries (SaaS, Paas, and Iaas).
